Nichols Concrete Products (NCP)
9675 County Road 42
Guin, Al. 35563

RE: Concrete Strength Testing

Nichols Concrete Products has one of the most aggressive strength quality control programs in pre-cast concrete products manufacturing for north and central Alabama. NCP manufactures pre-cast concrete septic tanks, storm shelters and burial vaults.

Perc Engineering in Jasper Alabama is an Alabama Department of Transportation certified concrete strength testing laboratory. Perc Engineering has been testing concrete strength test cylinders for NCP since January 2006 on a weekly basis.

Based on strength testing results performed by Perc Engineering, concrete used by Nichols Concrete Products meets or exceeds strength requirements for Alabama Department of Transportation, Alabama Onsite Waste Water Board and the National Concrete Burial Vault Association.

A handwritten signature in black ink that reads 'Jerry H. Key'.
